

Fighting Tyranny

In combating this agenda we are fighting against 194 governments.

They have control in every country, and have planned this agenda for decades.

They have at their disposal the immeasurable forces of

- the military
- police
- media
- medical institutions
- educational institutions
- the expertise of Pharma in biological warfare and assassination
- absolutely unlimited finance..

In short, there is no voice they can't drown, no law they cannot break – no person they cannot remove or kill.

So how do we respond?? How can we possibly fight back??

I felt faint. I struggled to think how I could survive this, let alone win.

I have divided the solutions into 3 parts which become progressively more militant. I feel strongly that parts 1 and 2 will be of immense benefit. Basically, taking refuge and spreading information and spreading non-compliance. Supporting each other and staying in touch. These parts are primarily defensive and preservative.

More offensive strategies are Legal action and Direct action. Legal action may be effective in discouraging companies from mandating vaccines upon their employees – and in helping employees to fight back.

Direct action could be effective if it was widespread and consistent – strikes and blockades, boycotts of businesses applying mandates, anything that paralyses or disables the apparatus of oppression.

PART 1 : Securing your personal welfare

1. **STORING FOOD** : If you are restricted from working then you will need food and water – you should store 100 kg of rice and 100kg of beans as an emergency food supply. This will last you 2 years. You may want to keep your food store hidden. When shortages arise, your supplies may be looted. Collect rain water.
2. **SAVING MONEY** : You will need money for rent and additional food supplies during the time that you are restricted. You should calculate the amount you will need for a 2 year period and put it to one side. Keep this money out of the banking system. Use solar for electricity.
3. **REFUGE** : Non-compliant people may be fined for breaking Covid rules, or simply detained for being “potentially infected”. The most likely places where this will happen are at CHECKPOINTS, or at HOME.

So avoid checkpoints where vaccination status is checked.

Later you may need to avoid being at home for more than 1 hour per day.

For sleeping and for much of your daily activities, have an alternative refuge to home. Your home can be used as place of storage where you can return daily to replenish supplies.

4. **EMPLOYMENT** : Develop ways of earning an income now that are independent of Covid policy – such as self-employment, working with awake businesses

PART 2 : Uniting and Persuading

1. **INFORMATION** : Spread information where ever you go. Educate others. You can only survive within a community of awake people. Recruit people to spread the message in schools, in postcode areas, online.
2. **COMMUNITY** : As you spread information, you will find out who is already awake – individuals and businesses. Its vital that you network with them – they are allies – mutual aide will be very important – you may need their help for supplies, refuge and employment.
3. **COMMUNICATION** : You will need safe and reliable means of communication with your awake community. This is important for sanity, and for joint efforts. Online channels such as Signal, Telegram, and message boards.

PART 3 : Fighting back

1. **LEGAL ACTION** : Helping to gather information to prosecute officials
2. **DIRECT ACTION** : Paralysing harmful operations through blockades, dismantling the infrastructure of harm.
